

I'm not robot

[Continue](#)

progress. The grad you choose depends entirely on your game mode and on which role you want to play in PVP. Below are some examples of builds to help you decide what's best for you. Niving build – [LINK]Here's what to aim for when niving and before you get your boss gear. First, focus on increasing weapons and then on armor. Try also finishing all your pieces as soon as possible, especially your armor, because it will give a pretty big DP boost. Click the image to view the larger Low-Tier construction – [LINK]Here's the low level of construction you want to use if you want to improve your equipment before you get the chief gear. You may want to use red coral earrings or magic earrings instead of Asula earrings, but they can be quite expensive compared to the rest of the tool. Click the image to view the larger Mid-Tier build – [LINK]Here's a middle tier build to use when you have a boss gear. You want to strive to get TRI as soon as possible and then work on your add-ons. If it is possible to use a TRI Red Coral earring and then you can replace the bronze dagger for Nouver in most cases until you have at least 320 accuracy when using Nouver. Instead, you can also use TET heve and TRI Muskan shoes, but griffoni and Urugon shoes are currently considered best in the slot in meta gear. Click the picture to view the moreJoftcap build – [LINK]Here's what you want to strive for if you're designed. It takes a long time to get to this stage, and there are a lot of small improvements and other add-ons you'll use along the way, but it's ideal your softcap build for PVP. For PVE, you want to use Kutum with a broken magic crystal. When you reach 261 AP with Nouver, you will want to stop using Kutum for PVE, however, until you reach 265 AP with Kutum. After a number of tests, it is confirmed that Nouver performs better in these brackets than Kutum. More information about AP and DP brackets can be found here You may also want to consider starting to put Caphras stones in your equipment for to help you get to the next AP volume. Start by getting level 4 in the main hand for an additional 4 AP. Then you'll want to move to placing level 2 in each armor piece before putting them all the way to Level 4 as well. Click the image to view the multiJojo game build – [LINK]Here's what to end the goal. It takes a long time to get to this stage, and there are a lot of small improvements and other additions you'll use along the way, but this is ideally your ultimate game build for PVP. Make sure to caphras rocks in your equipment for extra stats. You can also replace both Black Magic Crystal – Precision for Crystal of Elkarr (the best in the slot), but these are very expensive and harder to get. For PVE, you want to use Kutum with a broken magic crystal. When you reach 261 AP with Nouver, you will want to stop using Kutum for PVE, however, until you reach 265 AP with Kutum. After a number of tests, it is confirmed that Nouver performs better in these brackets than Kutum. More information about AP and DP brackets can be found here For PVP, it really depends. If you only do tier 1 node wars for example, then it is better to stick with Kutum because the AP node is capped i so and the additional DP can push you to a higher DP bracket. Click the image to view the larger When grinding use EXP Elixirs and Milky Tea or a simple cron meal and the beast is a ugas. For your rotating food in PVP (node wars/underpness), I would recommend using Knight Combat Rations, Valencia Special, Kamaslyvia Meal and King of the Jungle Hamburger and in that order. This takes 2-hour preliminary. If you are late or lazy, you can use the Exquisite Cron Meal. You will also need to use Elixir of Shock to have 5 crit. If you can't do this, then you'll need to use Margoria Seafood instead of a Kamaslyvia Meal. Guests can also use the Valencia special meal and the Kamaslyvia special meal, so it takes 120 minutes. Recipes for these are: ICON RESULT INGREDIENTS USE Knight Combat Rations Dark Pudding x1, Sandwich sa ham x1, wax wine x1, Meat Croquette x1 All Attack +5, Damage against human race +5, All Damage Reduction +5 for 120 minutes Valencia Meal Teff Sandwich x1, King of Jungle Hamburger x1, Couscous x1, Fig Pie x2, Date Palm Wine x2 Nullifying all Resistances +4%, Resistance in all Debuffs +4%, All Evasion +10, Damage Reduction from Monsters -6% for 110 minute Kamaslyvia Meal Rainbow Button Mushroom Sandwich x1, Coconut Pasta x1, Smokh Pit x1, voce wine x2, rainbow button gible cheese melting x1 Max HP +150, Max Stamina +200, Back Attack Damage +5% for 110 minute King of Jungle Hamburger Teff Bread x4 , Pickled vegetables x2 , lion meat x4, nut nut x3 Ignores all resistance +3%, Critical damage hit +5% for 110 minutes In addition, you may want to use Perfume of Courage (buff lost of death) and Tough Kit Tendon Elixirs. They're not usually necessary for war with a touch. Other buffers that you may want to collect can be found here: [link] Levels are important and effect your hit options or options for CC. Higher skill levels significantly increase your damage as well. If you are a new or return player, you can use Olvia channels for a 200% exp boost. The AP is very important to rangers and if you want to be one of the best, you need 200+ AP as soon as possible. You want to push for all AP add-ons and strengthen your weapons to get as much out of it as you can. Punctuality is essential for PVP. Target Kzarka Longbow and Bheg's Gloves. The red coral earring is also good for PVP, but it is not required. Mana Management If you have problems managing your mane, then there are some things you can do to try and make it easier: Use the Magic Crystal of Infinity – Extraction x2 on your weapon Use the Wind Waltz skill add-on: Instantly restore 3 MP/NP/SP to hit. Use Blasting Gust (Q cancel) on large groups of mobs to regen your mana quickly. Limit your mobility skills, such as Wind Step. I recommend checking out the ultimate ranger reference delta and succession ranger guide to wally. These two guides really helped me to learn everything I know about Rangers and influenced the way I play, as well as the tips in this guide. I also want to give a shouting crit#7771 to the Ranger breakup for PVE and PVP addons listed in this guide. These are the accessories I use, with a little adjustment. It's also worth checking out his battle guide book. Here are some useful links to check-out: 24/03/2017 – Added awakening skills, modified recommended grade skills, modified accessories section, added Kzarka, Nouver and Kutum weapons, added weapons, added accessories for skills added to other tips section. 26/03/2017 - Fixed knowledge images, modified skill names to match the game, added skills descriptions when hovering over skill names. 22/12/2017 - General update: revised gear recommendations, skills add-ons, hidden data added, more information, modified consumables and crystal recommendations. 23/12/2017 – Fixed some issues with add-ons, adding some more information to select tools and skills combos. 06/03/2018 – Added absolute skills, revised consumer information, updated crystal socket examples, updated skill combinations and descriptions, added examples of grade tools, updated tools recommend that they correspond to current meta. 12/04/2019 - Added Rabam Skills, widely hoped, updated recommendation tools to adjust current meta and game status. Updated skill descriptions, updated BIS crystals, updated accessories. 04/05/2019 - Updated tools build with links to bdo planner, Updated accessories for skills, adding newer links in useful links 16/05/2019 – Added dragon Slayer weapons and updated armor information, added i additional information for knowledge and updated combinations of abilities 13/06/2020 – Added information on succession, added blackstar Updated equipment, updated games and crystals 22/07/2020 – Updated useful links/credit section 30/07/2020 – updated building capabilities for the new new update, a link to the list of skills add-ons is added. List.
